Greenlane Road Reconstruction with Multi-Use Pathway - Phase 1A 2025

PROJECT LOCATION:

Greenlane Road (Lincoln Avenue to Cedarbrook Lane)

PROJECT BACKGROUND

In 2022, Greenlane was originally planned to be reconstructed between Lincoln Avenue and King Street, including a new multi-use pathway (MUP). Other infrastructure needs have since been identified on Greenlane, including watermain replacement, creek erosion repairs, bridge replacement at Konkle Creek and safe Active Transportation connections. This has forced a shift in priority to the road section to the east between Lincoln Avenue and Cedarbrook Lane. Therefore, it is now proposed that these other identified infrastructure needs be addressed under Phase 1A in 2025 and that the previously

identified works on Greenlane be deferred to a later date under a future second Phase 1B, given the cost and scale of the overall project.

Phase 1A includes reconstructing the section of Greenlane from Lincoln Avenue to Cedarbrook Lane to an urban standard, including new storm sewers, curb and gutter, a multi-use pathway, sidewalk and large culvert replacements. The Town's local watermain along with the regional transmission watermain will also be replaced from Lincoln Avenue to Ontario Street.

PROJECT UPDATE

The design for phase 1A is 90% complete. The project team is finalizing the plans and contract documents and aims to go to public tender in November 2024.

WHAT TO EXPECT NEXT

The Town will hold a Public Meeting to provide the community with an opportunity to view the final design plans and provide feedback in late September. Another notice will be mailed to residents, providing specific dates, times, and instructions on how they can get involved in the project.

WE NEED YOUR INPUT

Please contact Jemma Lynch to coordinate a meeting if you:

- Have your sump pump discharging to the ditch.
- Have any irrigation in the Town's right of way.
