Lincoln Avenue Road Reconstruction

Notice Dated November 2025

PROJECT LOCATION:

Lincoln Avenue (South Service Road to King Street)

PROJECT BACKGROUND & DESCRIPTION

Due to existing road conditions including narrow travel lanes and a lack of formal active transportation infrastructure, Lincoln Avenue requires rehabilitation. The Town plans to reconstruct the corridor to current standards while incorporating a complete streets approach and replacing the existing underground infrastructure as required. The Town is also experiencing frequent watermain breaks due to the old, deteriorated cement-lined cast iron watermain, which is a crucial driver for this project

PROJECT UPDATE:

The project is substantially complete with all infrastructure installed except for the area where the archaeology excavation is taking place. The archaeological work is expected to be completed early spring with the remaining road and watermain infrastructure to be installed immediately afterwards.

WHAT TO EXPECT NEXT:

In the coming weeks, the contractor will:

- Complete site cleanup
- Temporarily pave the section of road within the archaeological zone for winter maintenance
- Address any outstanding deficiencies for all completed work
- Remove equipment and materials from the site

The project will now enter a one-year warranty maintenance period for works deemed substantially complete. In the spring the contractor will return to address any additional deficiencies identified over the winter.

An update on the construction in your neighbourhood

The Town of Lincoln is responsible for clearing snow on the new sidewalks. For more details on winter sidewalk maintenance please visit. https://www.lincoln.ca/services/roads-transportation/snow-ice-removal/winter-sidewalk-maintenance

Please note that on street parking and stopping on Lincoln Avenue from Greenlane to King is prohibited on both sides of the roadway.

WORK PLANNED FOR 2026

- Finish the archaeological excavation and install all underground and above ground infrastructure in this section.
- Placement of topcoat asphalt from King to Greenlane (including manhole adjustments and final line painting)
- Complete the watermain crossing at the CN tracks north of Greenlane via trenchless methods

The Town of Lincoln would like to extend its thanks to residents for their patience and cooperation throughout this project. If you have any questions, please contact the project team.
